

Beginning on April 1, 2021, the stainless steel propellers listed below will no longer include a hub kit. The correct hub kit can be purchased separately and paired in your dealership (see ordering chart on reverse). New part numbers have been implemented for the affected props and are included below. You can use the new part numbers to order now. If you have questions, contact your Mercury account representative at 800.962.0927.

NOTE: This change DOES NOT apply to the following:

- Mercury aluminum propellers • Quicksilver propellers • Propellers that previously shipped without hub kits (including demo props)
- Mercury stainless steel props shipped with the Flo-Torq® Reflex hub kit for use on 40 to 60hp engines

How to select your new Mercury propeller hub kit

The SSR lineup of hub kits should be selected for quietest operation

1	Model Year	2019 and newer				2018 and older				All ³
