400HT

AQUADOR

SCANDINAVIAN HERITAGE

An adventure at sea is made up of an enjoyable driving experience, comfortable and spacious surroundings, a social and usable space for entertaining guests, beautiful and refreshing accommodation, a premium finish in upholstery and furnishings, and modern facilities that allow you to spend many days aboard with family and friends.

CAPTURE THE ESSENCE OF FREEDOM

Since 1995, we have kept abreast of boating trends so as to meet the demands of our discerning customers. In every Aquador developed over the last 30 years we have always kept the customers close to the development process to safeguard a customer friendly experience.

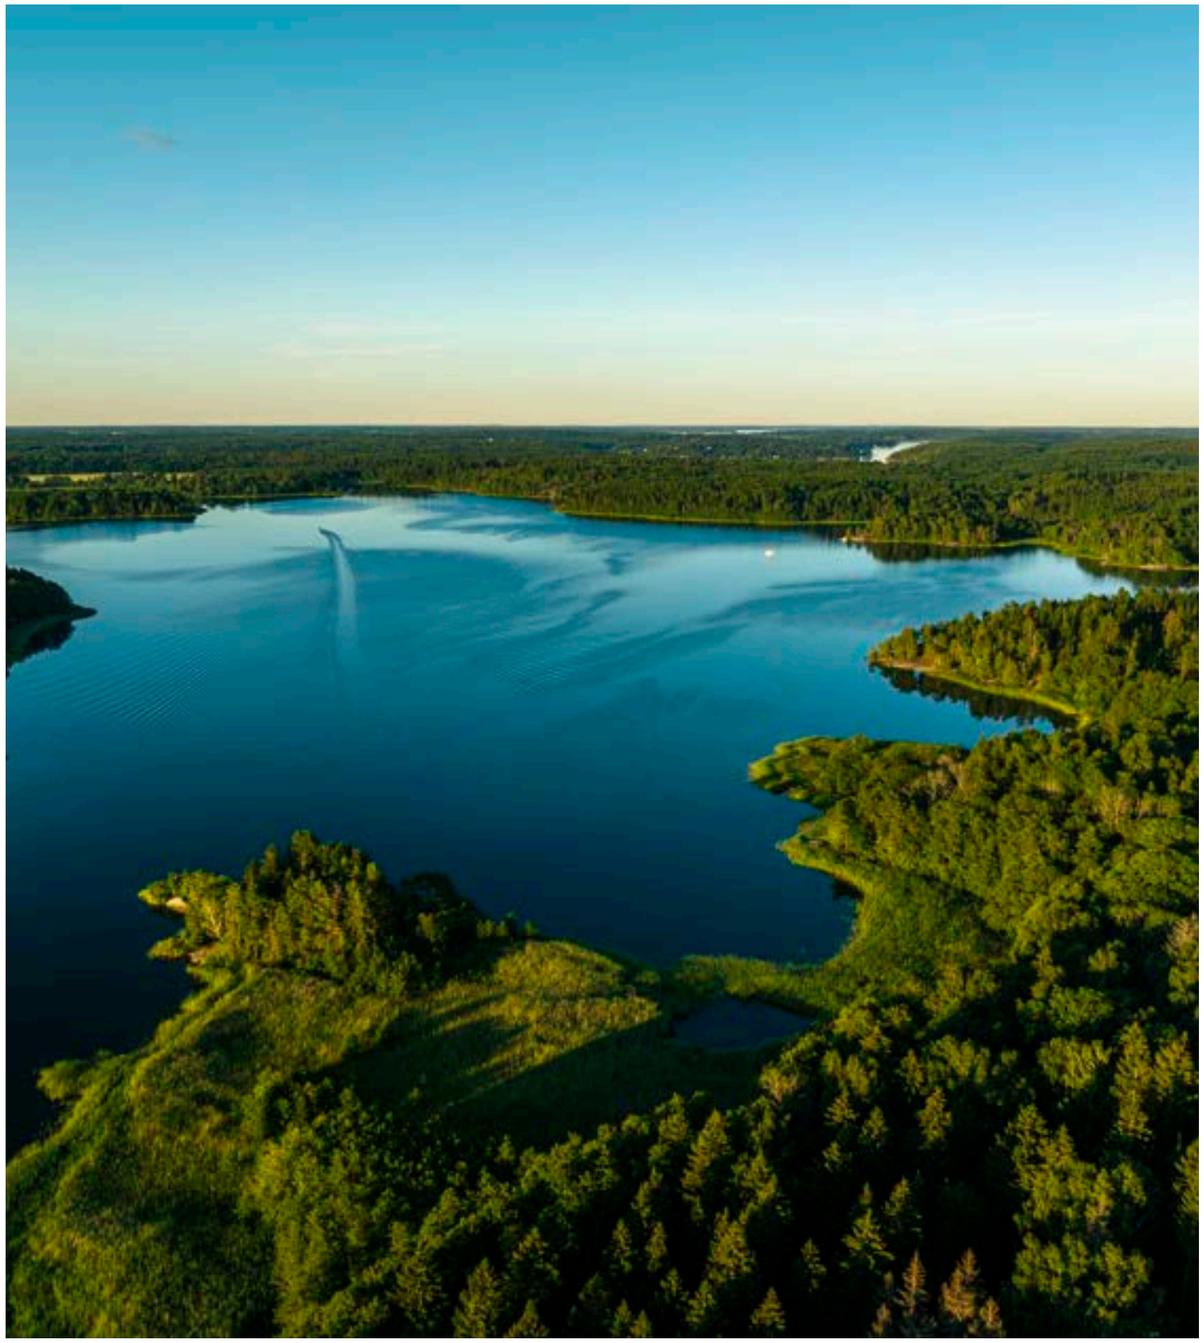
The purpose of Aquador is to provide what we call "Essence to Freedom". Aquador provides you the freedom to go boating in "all" conditions, cold, wet, warm and sunny. Powerful engines and higher speeds than a regular weekender mean you can enjoy the ride or get to your destination quicker – you can also outrun very bad weather. You have the space on board to spend as much time as you need – meaning you are free to set your course and are free to travel on longer journeys. Freedom is also achieved by appropriate 'limits', safety features onboard than allow peace of mind – (freedom of mind). The essence of freedom means you are independent and self-sufficient – no barriers holding you and your family and friends back.

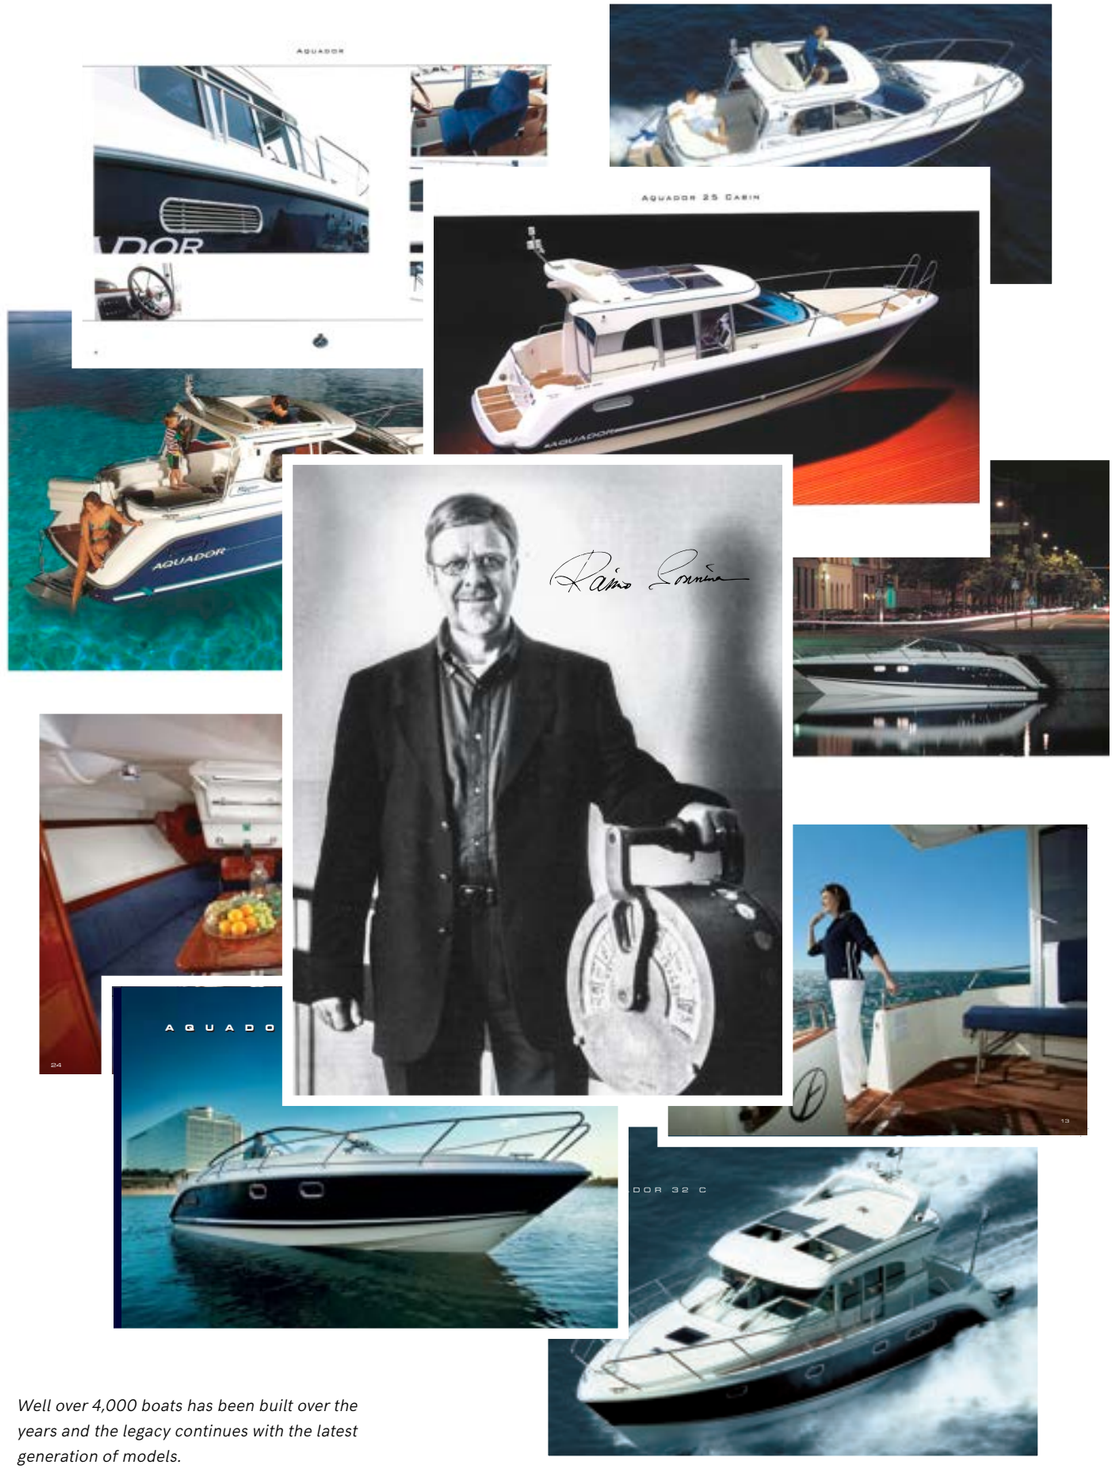
Freedom is the goal everyone aims for – escaping the mundane cycle of life and the stresses that come along with it – to set off on an adventure without limits and without hindrance.

Every Aquador is a powerful testimony of our dedication to excellence in creating elegant, yet pragmatic and affordable boats that feature innovative hi-tech solutions and the dynamic performance attributes that discerning boaters have grown to expect from the marque.

In keeping with that enduring passion for perfection, Aquador boats are built to the highest standards of safety, convenience and seaworthiness by a team of professionals who leave nothing to chance. All boats are finished to perfection, thoroughly inspected and CE-certified before they leave the premises.

Since 1995, Aquador has given the Essence of Freedom to thousands of boaters around the world. With the new series of Aquador models this journey will continue at least another 30 years.





Well over 4,000 boats has been built over the years and the legacy continues with the latest generation of models.

30 YEARS OF BUILDING DREAMS

Since 1995, Aquador has been producing iconic boat models for a wide range of enthusiasts. From sporty day cruisers to versatile weekenders, the team behind the Aquador brand has been committed to delivering unforgettable moments on the water. Well over 4,000 boats has been built over the years and the legacy continues with the latest generation of models.

Advertising entrepreneur Sakari Mattila is the father of Aquador and Sakari presented some early sketches on Aquador 22 to Raimo Sonninen, Bella Boats OY founder and owner, already early in the 90's. Raimo saw something interesting, but it was not good enough, so he contacted Rolf Eliasson. Rolf has been the designer/constructor for Nimbus many years but during 1992/1993 there was not much happening in the boat business due to the recession. Sakari and Raimo managed to convince Rolf to make the drawing for the first Aquador. The molds were made in Henån, Sweden and the first boats were built in Åbo, Finland. The first prototype was not up to standards but after some time they managed to get her right.

30 years ago, in 1995, the first model was presented to the market. Aquador 22. The model eventually became a success and during the first two years 110 boats were built.

Shortly after, another model was developed, Aquador 26. Aquador 26 was exposed to the market 1997 and the similarities with Nimbus was huge. Nimbus even filed charges against Aquador for trademark infringements. The model 26C was soon changed to 26HT and has since then been a classic model later replaced by 27HT and 28HT. Aquador 26DC was also developed and produced in Finland.

In the 1998, production was moved to Ireland, taking the then unused Sea Ray factory in county Cork. During the time in Ireland another four new models were developed, Aquador 21 WA, 25 WA, 25 C and 32 C. Now the assortment was seven models. Ultimately, the move to Ireland was not a long-term solution, and the quality was not up to Scandinavian standard. In June 2000 Aquador was sold to Bella Boats OY owner, Raimo Sonninen and immediately the production was moved back to Finland again.

In the period 2002 to 2008 Aquador had a fantastic growth, and new models were continuously launched. Aquador was established as a premium brand in the market and in 2007 Aquador was recognized as the fastest

growing shipyard in Scandinavia with 550 boats sold during the year. The Lehman crash temporarily slowed down the Aquador success story.

2009 Aquador receives another important recognition by winning the prestigious award "The Best Sport Cruiser of the Year" at the London International Boat with the model Aquador 28HT.

2010 the launch of Aquador 22C takes place and this gets a fantastic welcome on the market. It was called Mickey Mouse Caravan ("Musses husvagn") since it was a compact yet versatile and very popular.

2013 / 2014 the popular ST models were launched. Designer Jarkko Jämsen was designing Aquador 35ST and 30ST.

After almost 20 years in Bella Veneet OY ownership Nimbus Group acquired Bella Veneet OY in 2018. Aquador has belonged to the Nimbus Group family of boat brands and has since undergone a complete overhaul, making the brand more appealing to the international market. A sign of this progress was marked by the recent launch of Aquador in North America 2022.

Aquador, from its first days of operation, has chosen a segment of small premium vessels and is committed to fully satisfy its customers' needs rather than taking as much of the «general cake as possible. The boats are made in a laconic Nordic style - each element of the exterior and interior is in its place.

The Walkaround series includes small outboard and stationary boats. The boats received a spacious forward cabin, while the Aquador 25 WA model had even a small galley.

More spacious models Daycruisers consist of cabin cruise boats. Here there is everything necessary for comfortable rest on water - and a spacious cockpit, and the big bathing platform, a kitchen corner and a toilet.

Hardtop's semi-custom yachts are rich in interior spaces and are suitable for longer trips. The series Sport-Top has a sporty appearance with large roof hatches that allow to turn the boat into an open cruiser.

Cabin series models - boats and yachts with hardtop and closed salon in length from 6,5 to 11 m.

With over 4000 boats built since the beginning, the legacy continues with the latest generation that includes the 250HT, 300HT, and in January 2025, the largest boat we've ever built, the 400HT. More to come in the next 30 years of Aquador history.

1995

First Aquador launched 1995, Aquador 22.

1997

Soon after in 1997 Aquador 26 (the Nimbus copy) is launched which will be selling in huge volumes up until 2023 when it was called Aquador 28HT.

1998

Production moved to Cork, Ireland 1998.

2000

Aquador sold to Bella Boats OY in 2000 and production moved back to Finland.

2007

Fastest growing brand in 2007 with 550 boats built during a year.

2009

2009 Aquador receives another important recognition by winning the prestigious award *"The Best Sport Cruiser of the Year"* at the London International Boat with the model Aquador 28HT.

2010

2010 the launch of Aquador 22C takes place and this gets a fantastic welcome on the market. It was called Mickey Mouse Caravan ("Musses husvagn") since it was a compact yet versatile and very popular.

2013

REDESIGNED WITH LEGACY

After the immense success of previous generations, the design and development team at Aquador embarked on an ambitious project: to infuse the qualities Aquador is renowned for—safety, high quality, functionality, elegance, and durability—into a new generation of models. The goal was to create a range of boats that are innovative in design, handling, efficiency, style, and comfort.

The result of their efforts is a series of boats that truly embody the spirit of the Aquador brand in this modern era.

Each model, including the recently launched AQ 400HT, features the revolutionary 'AquaDynamic' hull. This cutting-edge innovation allows for extremely efficient cruising and effortless maneuverability, setting a new benchmark in performance. Both models are available with either stern drive or outboard motors, offering a choice unparalleled in their respective classes.

The distinctive outlines of these vessels reflect the evolving needs of modern boaters while staying true to Aquador's principles of vigorous design, Scandinavian heritage, precision engineering, and uncompromising safety. The DNA of Aquador is unmistakable throughout this new generation. These boats are undeniably Aquador but feature enhanced design, practical innovations, improved layouts, greater comfort, and increased efficiency to surpass the expectations of today's boating enthusiasts.

The timeless exterior and interior designs not only feel cutting-edge but also retain their appeal and value over time, a hallmark of Aquador craftsmanship.

Whether you're at the helm or anchored at your favorite destination, each model delivers an experience that reflects the design team's unwavering objective: to elevate every moment on the water.

400HT

CAPTURE THE ESSENCE OF FREEDOM

The development of the 400HT marks a defining moment in the modern history of Aquador Boats. The largest Aquador ever built, the 400HT is a premium vessel that represents the combination of elegant design, sophisticated amenities, and dimensions that offer the spaciousness and comfort of a small yacht.

Capturing the essence of freedom that the 400HT provides can be summed up by the unique offering of space, comfort, convenience, and a safe yet enjoyable driving experience. It is designed for those who appreciate premium quality, modern technology, driving assurance, stability & comfort, and distinctive design.

AQUADOR

The 400HT provides the opportunity and freedom to go boating in various conditions, featuring the hardtop design for all-weather comfort, advanced navigation and electronics supplied by the world's leading manufacturers for a seamless boating experience, and powerful engine options for appropriate pace and stability in both calm and challenging conditions. With the possibility to choose between twin outboard Mercury 350 HP V10s, twin stern drive Volvo Penta 320 HP D4s, or twin Mercury Diesel 270 HP V6s, you can choose the perfect match for your needs.

The co-pilot position is really something. You can be facing forward to follow the journey of the Aquador or you can be facing rear to relax or enjoy the people in the sofa. You can also easily turn the seating area to a chaise lounge by just pulling out the sliding part of the chaise lounge. No additional cushion, just slide it back and forth.

The standard 12″ chart plotter can be upgraded with the option to choose up to two 16″ multifunctional display screens, meaning control over the vessel's systems is never out of reach. Chart your course alone or get comfortable with your loved ones on the twin helm seat. The co-pilot position is unique, with forward or rear facing seating – or convert into a chaise lounge for ultimate comfort on longer cruises. All controls are ergonomically placed, and for a panoramic view, simply open the roof hatches and stand up to for an uninterrupted view.

The helm is ergonomically designed so the captain does not have to feel uncomfortable at any time. Everything is easy to reach, and you have amazing visibility as the captain. And, of course, mug holders within reach to make sure you stay hydrated.

The main living space on the 400HT is the large salon and beautifully fitted galley. Ample space is provided around the dining table on a very generous sofa set. Modern galley facilities and options for both diesel and electrical stoves, diesel oven, large fridge and optional smaller fridges, top-loading freezer, and generous counter space, means you are free to cook up a feast and can be well stocked with supplies on longer excursions. But when you're done dining, the table can be lowered to create an extra sleeping berth or lounge area. The optional TV module turns your salon into a modern entertainment centre.

Aquador always provides you with lots of storage areas and some changing seats. Everything is well thought through and based on 30 years of experienced boating. The hull windows make the cabins light and very cosy and provides a lovely view.

With a three-cabin layout and with eight berths overall, you can extend your boating adventures and create the perfect night's sleep for the whole family. Each cabin and interior design are well thought out to make practical use of available space. Keeping you comfortable throughout your voyages are ample, easy access storage spaces, day head with separate shower, light and warm interior décor, versatile lighting modes, and air conditioning and heating options.

The main cabin has a huge bed in where you can sleep or relax in various positions. Plenty of space to cuddle with your loved ones and you have a curtain to close if more privacy would be requested. The head space is enormous for this size boat. Underneath the bed you find a huge storage area.

The social spaces on this vessel are extraordinary. In addition to the chaise lounge/seating arrangement and the large salon inside, you'll find a spacious aft deck that includes a swim platform with an adjustable lounge that converts into a sunbed. Making your way to the bow you come to the enormous bow deck with optional adjustable sun loungers. There's a space for everyone and for all activities on the 400HT.

The spacious and luxurious head is designed to make you feel at home while on a boat.

The social spaces on this vessel are extraordinary. In addition to the chaise lounge/seating arrangement and the large salon inside, you'll find a spacious aft deck that includes a swim platform with an adjustable lounge that converts into a sunbed. Making your way to the bow you come to the enormous bow deck with optional adjustable sun loungers. There's a space for everyone and for all activities on the 400HT.

The Aquador 400HT's hardtop is designed to provide all-weather comfort and protection from the elements while maintaining an open and airy feel. A robust element that allows boaters to enjoy time on the water in any weather, whether cruising under the sun or caught in a rain shower. Large windows throughout the hardtop and cockpit create a seamless connection with the environment, allowing boaters to enjoy panoramic views. With a wrap-around canopy and cover for the aft lounge, the 400HT is ideal for outdoor relaxation.

Aquador 400HT is very generous with the social spaces in the boat. The huge and very comfortable sun lounges on the bow deck is one incredible space to enjoy life at. Here you really feel the essence of freedom while taking your early morning swim. You safely reach the bow space through the relatively wide side decks together with guard rails and grab rails to hold on to.

The galley on starboard side is well equipped and could be called a kitchen. Double sink and plenty of storage makes you feel like home. For sure a huge fridge to make sure you always have cold drinks available.

Measuring 12.10 meters with a 3.96 meter beam, the 400 HT boasts a spacious interior that can accommodate up to 12 people. The hardtop structure provides all-weather comfort and protection from the elements while simultaneously offering an open and airy feel due to the inclusion of large windows and sunroofs that can open up to let the air flow through the cockpit

Aquador's Aquadynamic hull allows planing at lower speeds and much less power is required to reach cruising speed, leading to greater fuel economy especially on longer passages. More stability is achieved in turning and the sharp attack angle at the bow means a softer ride.
